

## JAPS OF HAWAII FORCED TO TAKE U. S. OR JAPAN

(Correspondence of Associated Press)

HONOLULU, T. H., Oct. 14.—A movement looking to the abolition of the dual citizenship of Hawaiian born Japanese has been launched at an island civic convention on the island of Hawaii. Resolutions were adopted asserting that there are in Hawaii a large number of children who, under the laws of the United States, are American citizens and, under the laws of the empire of Japan, are "potentially citizens of Japan." The convention declared, "There is room in this territory for men and women who are either citizens of Japan or the United States; but no place for those who are citizens of both countries."

The convention recommended to the commission of the Hawaiian government which is going to Washington this winter, that it take up

with the proper authorities in Washington and the problem of dual citizenship in Hawaii, "to the end that through treaty or otherwise arrangements be made whereby American-born Japanese shall, on arriving at a certain age, declare their allegiance either to the United States or Japan, and that such declarations be honored by the government of Japan."

The diver has a practical way of getting at the bottom of things.

Unless a man has true faith he never calls for a second plate of fish.

Take things in their proper shape call in a physician for further information.

Family quarrels would not be so bad if other families would keep out of them.

The agitators have not yet gotten the old U. S. A. by the tail.

There is no such thing as an off year in politics any more.

Good horses are never known to make a mistake in their diet when grazing. Like all other horses, they are guided by the nostrils in the selection of proper food.

## NAVY WILL HAVE BASE IN ALASKA

(Correspondence of Associated Press)

VALDEZ, Alaska, Oct. 20.—By Mail.—Citizens of Valdez are looking forward with interest to the fulfillment of a recent statement that the navy department probably would establish a naval base in Alaska near the coal fields, and are urging the claims of the town.

The port of Valdez, they point out, approached by a narrow entrance several miles long, opening into a well-locked harbor ten miles long by five miles wide, carrying a depth of water of from 35 to 156 fathoms. The bottom, for the most part, is soft mud or glacial silt, carried into the bay by the swift flowing rivers from all sides. Prevailing winter gales are from the northeast, which would place warships under the lee of the land. Good water can be secured from many points to the base and wharves can be built at slight expense.

## ISSUE REPORT ON NEVADA OIL BASIN

Another section of Nevada, lying in the northeastern part of Nye county and crossing over into White Pine county, is also attracting considerable attention, largely because of the report that Clarence Berry and Frank Berry, prominent in the oil fields of southern California, have become interested in several sections of land in the new district.

A report on the Oil Basin field has been made by Charles H. Fenner, one of the successful operators in Tonopah, Goldfield, Manhattan and other early day camps, who has achieved a splendid reputation as one of the most conservative and reliable geologists and engineers in the state. Mr. Fenner, in a report made by him to the Nevada Oil Basin company, says, among other things:

Report on the Nevada Oil Basin district, locally known as the Current Creek oil field:

TONOPAH, Nev., Nov. 7.—To Nevada Oil Basin Co., Gentlemen: In compliance with your request, I have made a careful survey of the structural conditions of the Current Creek district, which I beg to present herewith, together with my conclusions as follows:

**Location.** The Current Creek oil field is located in the low rolling foothills of the White Pine mountains, extending from the headwaters of Current Creek in an easterly and southeasterly direction to the White River valley, Nye and White Pine counties, Nevada.

**Altitude.** The altitude ranges from 6,200 to 6,400 feet above sea level.

**Title.** The numerous holdings throughout the district are held by location in accordance and compliance with the mineral laws of the United States, and the local laws of the district.

**Development.** This being a field of virgin territory, no development work has been done.

**Geology.** The structural formation consists of limestone quartzite, and both fine and coarse grained sandstones capped in several places with black shale, both thin bedded and blocky, containing marine fossils, which are identified as belonging to the Triassic age.

The strong odor of oil given off by the freshly broken specimens of harder shale, and the globules of oil shown in the numerous vugs in the black limestone associated with the shale, compares favorably with oil having a paraffin base as found in the fields of Wyoming and California, and bear unmistakable evidence that the underlying formation should contain petroleum in commercial quantities.

**Structural Conditions Favorable.** The principal structural feature of this district consists of an anticline dome of varying width, its axis having a strike of about S. 25 degrees W. from the most prominent of black shale located in S. E. 1/4 of Sec. 21, Township 11, N., R. 61 E., which is flanked by a monocline located in Sections 20 and 31, T. 11, R. 61 E., having a strike S. 10 degrees W.

In the oil fields of Pennsylvania, Wyoming and California there are certain structural conditions of the strata often appearing at the surface of the country, which are considered as especially favorable for bringing the oil within reach of the surface, and these are selected as sites on which to bore. These are known as anticlinal arches, folds or domes and synclinal troughs or basins. It is these anticlinal domes or arches and synclinal folds or basins that are particularly sought after as locations for drilling by oil men, and though both are good, the anticlinal dome is preferred. Such a location appears to exist on Sections 6 and 7, Township 10 North, Range 60 East.

A peculiar feature of these arches or domes is that instead of retaining their arched form intact, they are usually hollowed out into deep wide basins at depth.

The beds of shale represent the beds of a deep cretaceous sea that abounds with fossil shells of marine origin, and doubtless were originally filled with seaweeds and other organic life.

Petroleum oil is generally supposed to be derived from carbonaceous or bituminous material derived from these sea weeds and marine organisms distilled from the shales by heat, either metamorphic or volcanic heat, and rising through fissures into cavities or overlapping porous rocks or sandstones capped with limestone.

**Conclusions.** The theory has been advanced that should the shale strata containing oil be exposed at the surface, the tendency would be for the oil to escape. This might be true of that particular strata, but an intervening strata of impervious material setting as a capping for succeeding deposits of shale or oil bearing sands would

still remain intact, as evidenced by oil being found at varying depths.

Along this line will be noted what is termed by E. T. Hancock of the United States geological survey, as a significant feature of the Upton-Thorton oil district located in the Black Hills of eastern Wyoming in his report on said field, who says: "That the fallacy and contention of some geologists is shown that where ever an oil bearing sand is exposed, so much of its oil will escape as to preclude accumulation in commercial quantity near by. The extent to which the oil escapes, or its escape at all, probably depends on a change in the dip of the bed in which it is contained or on variations in the texture of the rock that forms that bed, as well as on the level of the ground water and other conditions, all of which are subject to considerable variation."

Proof positive that oil is found in commercial quantities in black limestone like that found in "Oil Basin" and located in the S. E. 1/4 of Sec. 1, T. 11 N., R. 60 East, by the following:

FORT WORTH, Tex., Nov. 1.—The Forest well No. 5 of Root, Hupp and Huff, west of Pleasant Grove (Des Moines oil field in northern Texas), reportedly struck oil at a depth of 229 feet, and the well began flowing 500 barrels before the 65.8 inch was set. This production is coming from the top of the black sand and as such as the casing can be set the well will likely be drilled to the deep Ranger pay where the production is reached in this district.

Great credit is due to Mr. Sol Camp of Goldfield, Nev., for his assistance in the preparation of this report. Respectfully submitted, CHAS. H. FENNER, of the Firm of Moran & Fenner.

Scandal continues to be a fashionable society game.

A pig dog acts as if he might be vain of his ugliness.

A woman's fickleness is only excused by her constancy.

A bird in the hand is all right if you have no knife and fork.

### DIVIDEND NOTICE

To the Stockholders West End Consolidated Mining Company: NOTICE IS HEREBY GIVEN that at a meeting of the Board of Directors of the above corporation, held at the office of said corporation, Syndicate Building, Oakland, Alameda County, California, on the 12th day of November, 1919, a dividend of five cents per share upon the issued capital stock of the corporation was declared from the net earnings of the corporation. Said dividend will be paid on the ninth day of December, 1919, to all stockholders of record on the books of the corporation at five o'clock P. M. November 22, 1919. The stock transfer books will be closed at five o'clock P. M. on the 22nd day of November 1919, and will be reopened for transfer on the 9th day of December, 1919, at the hour of nine o'clock A. M.

WEST END CONSOLIDATED MINING COMPANY, GEORGE C. ELLIS, Secretary

Nov. 14, 1919

### SUMMONS

In the District Court of the Fifth Judicial District of the State of Nevada, in and for the County of Nye, Clementine Chopp, Plaintiff, vs. Steve Chopp, Defendant.

The State of Nevada sends greeting to said defendant, Steve Chopp. You are hereby summoned to appear within ten days after the service upon you of this summons if served in said county, or within twenty days if served out of said county but within said judicial district, and in all other cases within forty days, (exclusive of the day of service) and defend the above entitled action. This action is brought to dissolve the bonds of matrimony existing between you and the plaintiff upon the grounds of extreme cruelty and for equitable relief as more particularly described in the complaint filed in said action.

Dated Oct. 31, 1919.

(Court Seal) L. E. GLASS, Clerk.

M. J. SCANLAN, Plaintiff's Attorney.

Date of first publication Nov. 14, 1919.

## U. S. CAPITAL IS NOW INVESTED IN BELGIUM

(Correspondence Associated Press)

BRUSSELS, Oct. 14.—Capital from the United States is becoming invested over here on an increasing scale. It is now announced here that American interests are not only concerned in industrial activities but have turned their attention to water

ing resorts as a field for development. At Ostend a company has been formed with American capital for the development of the port industrially.

The highest steam navigated body of water in the world is Lake Titicaca, which lies at an altitude of 12,546 feet, partly in Peru and partly in Bolivia.

## BUCKHECHT ARMY SHOE

The Shoe that gives you "extra Service every step—Comfort every minute."

Sold in Black Gunmetal or Mahogany Calf or Indian Tan Calf.

For practical, everyday wear—for lasting comfort—for the sort of service you have a right to expect—look to the Buckhecht Army Shoe. It will give you a new sense of shoe-comfort—a new understanding of shoe-economy.

Made on the famous Munsion Last—from top-grade materials by top-notch workmen. Worn by thousands of men in all walks of life. Get a pair today!

At principal dealers on the Pacific Coast. If your dealer is not supplied, order direct from:

Manufacturers: BUCKINGHAM & HECHT, San Francisco

## Give the world the once over

LISTEN, fellows, to some straight talk. Many a man when he gets to be 40, misses something. He may have lots of money, and a fine family but—

He never "got out and saw things". After he gets settled down, it's too late.

Every man wants to see the world. No man likes to stand still all his life. The best time to TRAVEL is when you're young and lively—right NOW!

Right NOW your Uncle Sam is calling "Shove off!" He wants you in the Navy. He's inviting you! It's the biggest chance you'll ever get to give the world the once over!

The Navy goes all over the world—sails the Seven Seas—quints at the six continents—that's its business. You stand to see more old sights, wonderful scenery and strange people than you ever dreamed of.

You'll work hard while you work. You'll play hard while you play. You'll earn and learn. You'll get in addition to "leave", a 30-day straight vacation—which is more than the average bank president can count on.

You can join for two years. When you get through you'll be physically and mentally "lined up" for the rest of your life. You'll be ready through and through for SUCCESS.

There's a Recruiting Station right near you. If you don't know where it is, your Postmaster will be glad to tell you.

## Shove off! - Join the U. S. Navy

Lay a bet on  
rolling 'em with

## PRINCE ALBERT

the national joy smoke

ROLLING your own cigarettes with Prince Albert is just about as joy'us a sideline as you ever carried around in your grip! For, take it at any angle, you never got such quality, flavor, fragrance and coolness in a makin' cigarette in your life as every "P. A. home-made" will present you!

Prince Albert puts new smokenotions under your bonnet! It's so delightful rolled into a cigarette—and, so easy to roll! And, you just take to it like you been doing it since away back! You see, P. A. is crimp cut and a cinch to handle! It stays put—and you don't lose a lot when you start to hug the paper around the tobacco!

You'll like Prince Albert in a jimmy pipe as much as you do in a home-rolled cigarette, too! Bits and perch are cut out by our exclusive patented process. You know P. A. is the tobacco that has led three men to smoke pipes where one was smoked before. Yes sir, Prince Albert blazed the way. And, me-o-my, what a wad of smokesport will ripple your way every time you fill up!

R. J. Reynolds Tobacco Company  
Winston-Salem, N. C.

## Bevo

THE BEVERAGE

The all-year-round soft drink.

Leadership, once established, is strengthened and confirmed by its followers and imitators. Bevo's leadership is proclaimed by the largest rear guard that ever followed a leader.

Sold everywhere - Families supplied by grocer, druggist and dealer. Visitors are cordially invited to inspect our plant.
